I write to express my strong support for Utah's rooftop solar customers and my opposition to Rocky Mountain Power's proposed fee increase of \$4.25 per month. I have made a critical investment in clean energy by installing solar panels on my home. This is at a time when Rocky Mountain Power is not.

While I used my own money to buy solar equipment, the benefits accrue to many Utahns -- in the form of reduced air pollution, protection against fossil fuel price swings, and the creation of clean energy jobs right here in Utah.

I did what I wish Rocky Mountain Power would do: invest in Utah's renewable energy resources. I am very concerned that a solar penalty will stop some customers from "going solar" and impede progress toward renewables across the grid.

I stand with HEAL Utah and the rooftop solar energy producers of Utah and ask that the \$4.25 solar penalty not be approved. My personal investment in clean energy creates clear benefits to Utah's health, environment, and economy. I should not be penalized.

Sincerely,

Todd Olsen
